

Infor FMS SunSystems 5 Training

DATE	COURSE NAME	OBJECTIVE	FEES
8 th – 10 th October, 2010	Ledger Accounting	This course focuses in detail on the core Financials module of SunSystems Version 5 and users will explore all aspects of the single ledger and period accounting theories as well as transaction analysis. User will also have the opportunity, through the use of exercises, to create chart of accounts and journal type records to enable the entry of different kinds of transaction. There are also sessions dedicated to Inquiring on the ledger, managing payables and receivables and on multi-currency configuration and entry.	₹ 125,400
14 th – 15 th October, 2010 9 th – 10 th December, 2010	Fixed Assets Management	SunSystems Fixed Asset (Asset Register) module is a tool that allows you to record details of your fixed assets, along with associated acquisition, addition, depreciation, and disposal transactions. It will automatically depreciate them according to various rates and percentages and, because the module is fully integrated with Ledger Accounting, all relevant general ledger postings will also be created. Powerful analysis capabilities allow you to report and inquire on your assets in many ways and, when the asset is no longer in use, the module can automatically generate ledger accounting disposal transactions. In short, the module manages the entire life cycle of your fixed assets. Further information such as insurance valuations and maintenance data can be held in Asset Dairy records.	₹ 85,800
29 th October,2010	Corporate Allocations	Covers the SunSystems 5 Corporate Allocations module.	₹ 46,200
22 nd -23 rd November, 2010	Inventory Management	You will explore the stock taking procedures and stock movements, the enquiry and reporting capabilities of this module. Throughout the course you will have the opportunity to practice your skills using guided exercises.	₹ 85,800
28 th – 29 th October, 2010	Reconciliation Manager	Reconciliation Manager (RM) provides the facility to match and reconcile transactions in SunSystems ledgers, either automatically according to predefined match criteria, or manually. Reconciliation Manager allows you to reconcile transactions on different accounts. For example, to reconcile transactions that appears on two corresponding inter-company accounts. Because of its flexibility Reconciliation Manager has a number of uses including: Bank reconciliation Inter-company reconciliation Debtor/creditor payment matching	₹ 85,800
