

# Vision 6 Training

DATE	COURSE	OBJECTIVE	FEES
22 <sup>th</sup> – 23 <sup>th</sup> November, 2010	Vision XL	Delegates will gain an understanding of what Vision Executive can do, and its main reporting and analysis functionality. Delegates will learn how to design more advanced reports in Vision Executive, e.g.: across multiple business units and budgets; learn about the more advanced functions: using hierarchies; using dynamic filters; creating statements with link codes; complex user defined outputs, designing reports with charts.	₹85,800
24 <sup>th</sup> – 25 <sup>th</sup> November, 2010	Vision Executive	Delegates will gain an understanding of what Vision Executive can do, and its main reporting and analysis functionality. Delegates will learn how to design more advanced reports in Vision Executive, e.g.: across multiple business units and budgets; learn about the more advanced functions: using hierarchies; using dynamic filters; creating statements with link codes; complex user defined outputs, designing reports with charts.	₹85,800
20 <sup>th</sup> – 21 <sup>th</sup> October, 2010	Vision Budget	Vision Budget Management controls the entire budgeting process. User defined fields such as Approval Authority, can be attached to Budget, Budget Groups and workbooks. Vision Budget Management enables you to control the entire budgeting process including the dispatch and collection of budgeting workbooks and the automatic transfer of budget data from Excel to the Data Warehouse.	₹85,800
22 <sup>nd</sup> October, 2010	Vision Alert	Vision Alert is an extension of, and an aid to Vision XL, Vision Word and Vision Executive used to monitor and analyze information and program automatic, conditional responses to the information received. Vision Alert is an easy to use, highly flexible means of automating designated reporting tasks, on an event-or time-driven basis. 'Alerts' are created that enable Vision Alert to make automated, conditional responses to specified conditions in Visio reports.	₹46,200
